Maternal Health in Cambodia

Chhea Chhorvann
Deputy Director, NIPH

Helsinki 25-27, 2011
Maternal Mortality Rate per 100,000

Sources: CDHS & WHO

CDHS 2000: 437
CDHS 2005: 472
CDHS 2010: ?
WHO estimate in 2008: 290
MGD target 2015: 250
Vietnam 2008: 56
Number of Health Centers without Midwife

Source: MoH
Proportion of Pregnant Women Receiving Antenatal Care (1\textsuperscript{st} ANC, At least 4 visits)

Source: CDHS 200, 2005, and Preliminary result of CDHS 2010

Proportion of Birth Delivered by Skilled Birth Attendants
Responses: National Targets by 2015

1. Increased number of health facilities provide Basic and Comprehensive Emergency Obstetric & Newborn care from 44 to 174

1. Increased Antenatal Care Coverage (at least 2) to 90%

2. Increased percentage of deliveries attended by Skilled Birth Attendants at health facilities to 70%

3. Increased Post-natal Care Coverage to 50%

4. Increased Contraceptive Prevalence to 60%

5. Increased access to reproductive, maternal and newborn health by removing financial barrier and ensure that 95% of the poor is covered by Health Equity Fund

6. Improved health seeking behavior among individuals, family and community
Roles of NIPH related to Maternal Health

• Health care system strengthening
  – Human resource development and management
  – Quality improvement

• Training & research in nutrition
  – Capacity building in the areas of nutrition

• Other scope of work at NIPH:
  – Non communicable diseases (Hypertension and other chronic diseases)
  – Occupational & Environmental health (global warming & health impact, insecticide…)
